

**MISC. PLANS** ..... Set of 5 assorted scale plans (master original drawings) of a stock yard unloading chute, dope box, broken axle, typical track section through cuts, and a stylish cover sheet w/logo....\$10.

### GREAT NORTHERN:

These are from a major First-Class collection of rare GN blueprints. All of these contain **tremendous** detail of trackage, structures, physical surrounding features, shippers, trackage of foreign RR's, and vicinities in general, made from portions of GN Right-Of-Way and Station Maps, areas of work marked in red. Many of these are **VERY** large and detailed, folded, priced accordingly. Erased lines of abandoned trackage and facilities prior to the issue date can still vaguely be seen. All originally drawn circa 1900-1918, revised to the dates indicated below. While the work described for each blueprint may sound insignificant, the vicinities of each blueprint are quite large and detailed. All are in a beautiful "whiteline" ink on blue paper, unless noted by "(Bli)" for Blueline on white. "(#x)" indicates more than one of the same blueprint is available for sale. All are near mint to mint ..... See prices below:

### GN - B.C. CANADA:
